

CELEBRATING 10 YEARS

THIS year, A G Glass is celebrating its ten year anniversary.

It's been a busy but successful decade for owner Andy Gill and his wife, Trudie, who have built up the window and glazing firm to be one of the area's more highly regarded businesses.

Andy has more than 20 years experience in the industry and wanted his own shop to ensure local people were offered the best products and service.

Right from the start customers are safe in the knowledge that Andy will provide a thorough service from start to finish. From the initial quote to the final installation, Andy is there to ensure customers receive this high level of care whatever the size of the job.

When it comes to products, there's not a lot A G Glass doesn't do. From supplying doors and windows, roofline products to mirrors, table tops to shelving, they also supply cut glass to the trade and public as well as coloured painted splashbacks for around the kitchen worktop.

It's important to note everything is made to measure so customers really are getting a bespoke service every time. And don't worry if you have an older or listed property as A G Glass can supply and fit secondary aluminium glazing in place of upvc windows.

Andy has a good team of fitters to support his continuing run of excellence. He said: "We're a family-run business, but not too big, so customers get to see the same faces.

"We are proud to provide a local service with very competitive prices and we tend to stay local within a 15 to 20 mile radius. As one of Braintree's most successful window companies we've built up a loyal customer base and a lot of our work comes from recommendations."

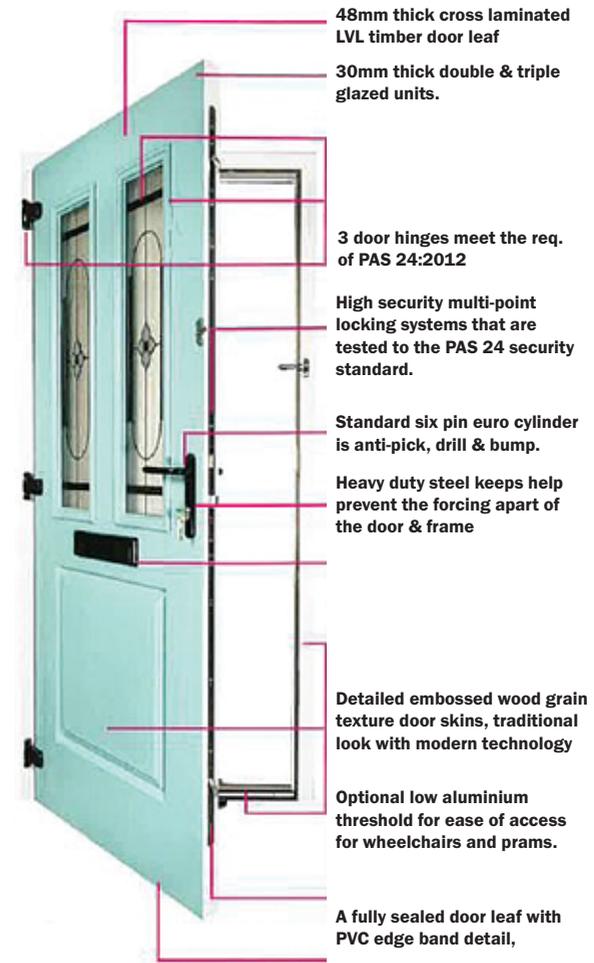

Where doors are concerned, A G Glass provides various styles of upvc as well as solid wood composite doors which are becoming more and more popular, these come in various colours to suit your individual style. A G Glass also replaces misted double glazing units in older UPVC and wooden windows. "This is quite a busy part of the job but it's a simple procedure to get customers seeing clearly again and without a huge bill."

Andy has good relationships with local builders/traders as well as local estate agents for which he carries out maintenance work, anything from broken hinges to handles and locks.

Quotes are free and for those visiting the showroom there is car parking available.

Need glazing? Then get in touch with A G Glass where there's the personal touch from a family-run business.
